

# **WATER TREATMENT PLANT DESIGN PROGRESSES**

The Lake Oswego Tigard Water Partnership held an open house in October. The water treatment plant is located on Kenthorpe Way in West Linn. At the open house, neighbors saw how design is progressing and provided comments. Site layout, architectural design, landscape concepts, construction and operations were reviewed. Project staff held 14 "Backyard Visits" with adjacent neighbors over the past few months as well as

dozens of neighborhood meetings to talk about design and understand neighbor concerns. Designers are taking these comments into consideration for the land use application submittal in January 2012.

To learn more about how your water treatment plant design is progressing, go to [lotigardwater.org](http://lotigardwater.org) or call 503-697-6502.
